## Tips on how to get your kitten or cat to use the Groom 'n' Massage post

1. The fleece flower has a magnet on one side so it will stick to the hex head of the bolt used to hold the Groom 'n' Massage post in place. The center of the flower is filled with catnip on the top. This should attract your kitten or cat to the post.
2. You may also try spraying the post lightly with catnip mist sold at most pet stores.
3. Try gently brushing your kitten or cat with the post before attaching it to the base. The post is heavy so be sure you have a good grip on it. It is meant to be stationary so your kitten or cat can groom themselves.
4. Your kitten or cat should willingly enter the wooden base to investigate the hanging toy and bell. If they need encouragement, a treat or two placed on the floor inside the base should do the trick.
5. They'll love playing with the Peek-a-mew curtain both inside the wooden base and outside.
